

# ALUNIFLEX 2000

## RV Veranda 10' projection

The RV veranda can now take advantage of the arrival of the walls Aluniflex 2000 .

### IMPORTANT

The veranda must be installed on a perfectly level patio and straight with the wall of building.

- 10' projection. Walls 80" high.
- Aluminium structured with vinyl in the bottom and full screen at the top, both inserted with beading. See (\*\*) Colors available for bottom of walls.
- Sliding windows with clear or tinted vinyl. Optional 5mm glass
- The height from awning rail to patio is standard at 96".
- The included 36" aluminium door has clear or tinted vinyl in the top section and the chosen coloured vinyl in the bottom.

To order the RV veranda with the Aluniflex 2000 walls, you must proceed as follows.

Fabric and roof truss.

1. Choose the width of the fabric.

Walls:

1. Choose the desired width of the veranda. As an example you may choose a 30' fabric with a 15' veranda.
2. Choose the location and opening direction of the door. The door opens towards the outside.

Add the price of the fabric with roof truss to the price of the walls and the cost of freight to obtain the price of a complete veranda.
